APX-24

New Transportable X-ray Equipment

ASPEN IMAGING HEALTHCARE introduces the "APX-24", the most advanced and powerful Transportable X-ray units. These devices are compact, lightweight, reliable and easy to use. They are ideal for human and veterinary use. Create your own D.R. package with one of our Flat Panel Detectors and create high quality images anywhere. No matter what the requirements are we can customi-ze your digital radiography system.

Specifications	Ref.	APX-24
Max output power		2.4kw
Imput power		100~120 / 200~240VAC (50Hz/60Hz)
Inverter frequency	Inverter	102KHz
	Filament	40KHz
KV range		40KV~100KV(1KV STEP)
mAs range		0.32mAs~100mAs
X-ray tube	Manufacturer	TOSHIBA
	Model No.	D-125SB
Focal spot		1.2mm
Target Angle		16°
Anode Heat storage capacity		35KJ
Maximum anode cooling rate		250W
Laser point	Peak wavelength	650nm
	Optical power	<1mV
Lamp (LED)		More than 100 lux
Filtration total		Al. Equiv. 2mm
Weight	Net	27.99 lb
	Gross	46.51 lb
Packing Dimension		25.59x15.74x13.77in
		2 years
