Tailored Monitoring to Each Patient

MFM-CMS

Central Monitoring System

EDAN

A world of potential

Bring the data to your sight

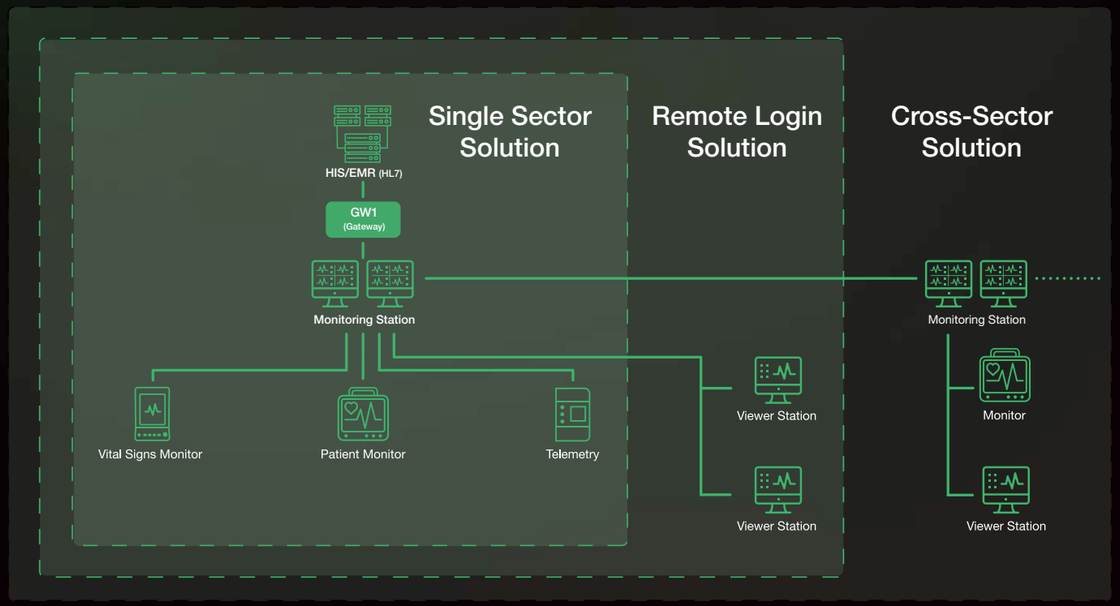
The new generation MFM-CMS brings you a comprehensive bi-directional central monitoring solution for all EDAN monitors. It offers seamless monitoring management from transportation to hospitalization, from mobile patients to bedside cares, from intensive units to operation theatres, bringing easy access to well-organized monitoring information.

Max. 4 screens

Max.128 patients/sector

Data review

Remote control



The Monitoring Station provides real-time patient data monitoring for nursing requirements. Functions like patient management, alarm setting and remote NIBP measurement help to simplify tedious work for caregivers. All patients' data are well-organized and available to transferred to other Monitoring Station or Viewer Station.

The Viewer Station can be located anywhere as needed, such as doctor office, duty office or even corridor. Caregivers can access detailed information of selected patient among the whole system with account control.

With the cross server connectivity, MFM-CMS central monitoring system allows supervisors observe the alarm information from different sectors or departments simultaneously, ensuring the safety of all patients at one glance.

Storage capacity for each patient:

720 h	720 h	720 h	720 h	720 h
NIBP Review	Alarm Event	ARR Review	Trend	Full-disclosure Waveform
